DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The examiner notes for the record that applicants did not supply an English abstract for JP 07-072795,B but supplied a machine English translation of the claims of this document. This examiner cites two English abstracts of JP 62-231248 A which is related to this document.

a. Derwent- Acc-No: 1987-324793, Nippon-Zeon KK Patent Family PUB No JP 62231248 A, dated October 9, 1987, two pages, English abstract

b. Patent Abstracts of JAPAN Publication number: 62:231248, Nippon Zeon Co LTD, 09 October 1987, two pages, English Abstract.

The examiner cites Morren et al (US 6,326,127) as an equivalent of JP 2002/534714 A cited by applicants. Tesler et al (6,037,101) is cited as English equivalent of JP 10-288838, Knoll (US 2002/0001775 A1) is cited as English equivalent of JP 2002/72457, Sakurai et al (6,025,098) is cited as English equivalent of JP 10-31303 a and Mayenez et al (EP 0 696 761 A1) is cited as an English equivalent of JP 8-69107 A. Equivalency is established by Search report cited by applicants.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawabuchi et al (5,075,377). With respect to instant claims 1-8, the Examples of Table 1 of Kawabuchi et al anticipate the instant block copolymer composition. The examiner notes that there is no disclosure for use in photosensitive flexographic plates in Kawabuchi et al, but since this is an intended use of the composition the body of the claim is seen by the examiner to fully and

intrinsically set forth all of the limitations of the claimed invention, rather than any distinct definition of any of the claimed invention's limitations and is of no significance to claim construction. *Pitney Bowes, Inc. v. Helwett-Packard Co.*, 182 F.3d 1298, 1305, 51 UAPQ2d 1161, 1165 (Fed. Cir. 1999). See also *Rowe v. Dror*, 112 F.3d 473, 478, 42 USPQ2d 1550, 1553 (Fed. Cir. 1997) and MPEP 2111.02. Example 1 of Kawabuchi et al has a 2.5 number as required by instant claim 1 and example 5 has a 3 number falling between 2.5 and 3.8 inclusive as required.

4. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by DuBois (2005/0137312) as of the effective filing date of the Provisional application No. 60/532,017 filed December 22, 2003. The effective filing date of the instant claims is 24 September 2004. No certified translation of applicants' foreign priority document is of record. With respect to instant claims 1-8, the composition set forth in the Abstract and as Polymer #5 as identified in [0066] is found present in Provisional application No. 60/532,017, thus, the polymer mixture making up the Polymer #5 as identified anticipates the instant composition of applicant's claims 1-8.

5. Claims 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
